NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Nearing the airport, ATC instructed me to cross over top of the field and enter a left base for runway 4L, and later cleared me to land. I wanted to fly a faster approach, in part to account for potential rough air on approach, because I thought it was somewhat windy and I experienced some bumpy air during the flight. The intent was to lose speed in the flare and proceed to a normal landing.

Approaching the runway surface, I flared the airplane. Unexpectedly, the landing gear impacted the runway above my intended touchdown speed, resulting in a bounce. I was surprised and startled by the early impact and bounce. In my startled state, I tried to save the landing, which did not occur. As I recall, the aircraft bounced at least 2-3 times, in what may have been a porpoise pattern. At some point, I believe I increased power from idle, and also retracted flaps, perhaps as a delayed response to try to regain speed or go around. It was too late to recover.

The aircraft eventually stopped on the runway and airport operations staff met the aircraft. It was apparent that the nose landing gear was damaged, the nose tire had blown, and the propeller was damaged from a ground strike. Later, the aircraft was towed to parking.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

- Maintain a better flare attitude to lose airspeed prior to touchdown
- Go around following the initial bounce or first sign something isn't right
- Better manage stress of flying into a major airport and treat approach like any other approach
- Don't over-worry about previous weather reports or weather experienced earlier in the flight
