Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left wingtip is scraped, left rear spar is twisted, rudder is bent and left wheel damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The PIC stabilized the approach to Runway 08 at KBDU, both on speed and glidepath. Shortly after a stable and normal three-point touchdown, the aircraft ground looped to the left, during which the left wing briefly dragged on the pavement. Once the aircraft came to a stop, the PIC visually inspected the wing/ aileron and observed no visible damage. The PIC also visually checked the runway and found no danger of FOD. After completing his visual inspections, the PIC made the educated decision to safely taxi the aircraft back to the hangar. There was no traffic in the pattern at the time of the ground loop. To the best of the PIC's recollection, the aircraft remained on the runway surface area during the ground loop. There was no adverse impact to either KBDU air traffic or to ground traffic, and there were no interactions with the general public, real property or personal property. The aircraft was safely returned to its hangar, where it was inspected more closely for damage.
