Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop strike on grass. Left lower wing kinked. Left wheel rim damaged. Small hole in fabric on left wing tip. Small gouge in runway from left wheel rim.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

This was a practice aerobatic flight in the NOTAMed aerobatics box adjacent to runway 1/19. Everything went normally. Entered the traffic pattern for a landing on RNWY 1. The winds were calm. The landing was normal. After about 1500 feet of roll out the aircraft started drifting to right. I tried to correct with left rudder and brake. The aircraft tipped to the left scraping the left wing tip and continued off the runway. I had to brake hard to avoid a 3 foot deep drainage ditch parallel to the runway. The aircraft tipped up onto its nose. The prop stopped after contact with the grass. I exited the plane normally and jumped off the trailing edge of the left wing. There were no injuries. The aircraft came to rest on its nose. The only damage to the airfield was a small gouge on the runway caused by the left wheel rim.
