Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Engine submerged, propeller bent, wing spar bent, right main collapsed, wing tips struck

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I left Bartow and flew over to Kfll (Lakeland International) for a touch-n-go. After completing one touch-n-go on runway 09 I departed westbound and made a left turnout to the east towards KPCM. Upon arriving I entered the left downwind at 2,000 ft MSL and put on 10% of flaps midfield. On turning base I put in 20% of flaps and turned final. On final I added the final 30% of flaps and came down to a normal glide slope into KPCM. As I was touching down there was a moderate wind from the left which I corrected with right rudder to maintain direction on the runway. As I touched down I was slightly to the right of the middle of the runway and I raised flaps and pushed in the throttle to take-off. Upon pushing in the throttle I started to skid left and couldn't correct it in time which caused the accident.
