

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Mesa State: AZ

ZIP: 85215 Country: USA

Latitude: 33.458520 Longitude: -111.734650

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 09/27/2019 Local Time: 17:22

mm/dd/yyyy

Time Zone: AZ (MST)

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N4119S

Manufacturer: Diamond

Model: DA-40

Serial Number: 40.804

Year of Manufacture: 2010

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 2646 lbs

Weight at Time of Accident/Incident: 2200 lbs

Number of Seats: 4 Flight Crew Seats: 2

Cabin Crew Seats: N/A Passenger Seats: 2

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft nosegear is folded and the lower front cowl is damaged, both wing tips show external damage. Wing root trailing edge shows stress fractures. Fuselage shows stress fractures on bottom left rear and bottom right rear aft of baggage area. Some punctures and scrapes to bottom of fuselage. Propeller separated from aircraft flywheel. Damage to airport was limited to the REIL light (North side of Rwy 4L) and a concrete culvert was fractured.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

"Below is the detailed report of how the incident occurred.

I requested ground for a touch and go and then i was told to taxi to 22 left via delta taxiway.

upon reaching 22 left i contacted tower on 124.6 and was instructed to cross 22 left , take taxiway charlie

and hold short 22 right and contact tower on 119.70 . I contacted tower and was cleared for takeoff on 22 right and make right traffic pattern.

On my downwind i was cleared to land on 22 right and responded by saying "22 right clear to land".when i was on short finals, i got confused with what i should do after the landing as i was cleared to land.

i was thinking that i am cleared to land and i requested for touch and goes , so should i do the touch and go after the landing or just exit on the taxiway.

i was confused with what should i do next after the landing . i did not contact the tower to ask for clarification on this as i was close to the runway and decided to focus more on stable landing.

.I landed about 200 feet to 300 feet beyond the 1000 foot marker and as i requested for touch and goes i was expecting the tower to call me and clear me for touch and go any time, so i was rolling on the runway with little power . The sun was directly into my eyes and i was not able to see the end of runway clearly

but i felt that i have crossed half the runway and that i have less than half the runway left for takeoff . i decided to give in full power and takeoff and inform the tower that this is a go around

once i am off the runway. But as soon as i gave full power , i got a call from tower asking to exit from echo 1 taxiway which is at the end of the runway. To comply with atc, i cut the entire power and tried to stop

the aircraft by applying brakes. i did my best to stop the aircraft and it slowed down substantially but i had reached the runway end and looking at the speed i knew that the aircraft wont stop and it will go down the ditch

at the runway end. so i decided to give in full right rudder to exit the taxiway echo1 (which joins the runway at the end) and stay on the paved area and get enough room to stop the aircraft.

But the aircraft skid off the runway and the incident occurred. everything went black and blue and noise in my ear. i informed tower that i am fine and send for help.

i got out of the aircraft. i was perfectly fine physically . i secured the aircraft by switching off the battery master and switching off the engine."

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

"HOW COULD THIS HAVE BEEN AVOIDED ?

I think it could have been prevented if i would have asked the tower about clarification on "cleared to land" instruction. i should have asked the tower that i requested for touch and goes and if i am cleared for touch and go or just land and exit at the taxiway.

I don't blame the tower on anyone else for this incident as it was clearly my mistake that i did not clarify the instruction. I know that such incidents could lead to much intense outcomes like aircraft catching fire , causing damage to a passengers life and much more . this could have resulted in very serious outcomes.

i realize my mistake and i request for just one last chance to improve this and become a better and safe pilot . I have learned a lot from this incident .

Please give me one last chance to be back in the air and improve it .

I have also attached the airport diagram for more visual clarification.

Thanks
regards"
