NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed KWLW (Willows) mid morning and made a stop in Colusa (O08), then departed and flew over my ranch mainly Cortina Creek area East of I-5 and South of Myers Road, Williams, CA. I Flew back to Colusa (O08) and made a phone call. I Then stopped in at Ag Air and spoke with Bud Humphrey owner of business. I Then flew back over ranch. I was going to talk with the equipment operator near Cortina Creek,(after that, I then planned to fly back to Willows CA). I saw a tractor in neighbor's field working ground and the dust from the implement indicated the wind was light, blowing from the South. I then made a left downwind entry to my gravel road, then flew left base and then final approach. There is an electric wire (approx 30 feet high) that runs along Myers Road. I flew too high on final approach to the gravel road which made my touch down point (approx 2/10 of a mile South of Myers Road) too far south. I was in the three point position traveling approx 25 to 30 mph when I decided to apply light braking(heel brakes), during this time I looked to my right to see how close I was to the weeds. Looking to my right caused me to unintentionally steer to the right and my Right Main gear entered a small ditch approx 6-8 inches deep(39.094913 -122.097745). I then attempted to power out of the ditch by applying throttle. I continued approximately 65 feet, until my Right Main gear locked up due to the weeds wrapping around it. The plane then ground looped hitting the left wingtip. The plane then turned to the right and and tipped up on its nose. The plane then slowing tipped over on its back in the Rice Field. I shut off the master switch and Magnetos and crawled out of the plane left side window. I called 911. A Miguel Sanchez [REDACTED] who works for T&P farms was driving a tractor in the field south and came over to see if I was OK. I was out of the plane at the time.
I was the only occupant of the plane. I had no injuries. Damage occurred to the plane. No damage to the rice field. The property is owned by myself, my brother and my mother.
I have landed on this road approx 5 times previously.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

When it appeared that I would land too far south, do a go around and fly a lower approach over the wire.
Also not look to the side and only straight ahead. Because looking to the right caused me to steer to the right.
