NOTAMS (D and FDC), AIRMETs, SIGMETs, PIREPs in effect at the time of the accident/incident:

None

DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☒ Substantial
☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left wing tip damage including slight damage to front and rear wing spar. All of the damage was contained to the wing only. No damage to left main gear.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My main purpose of this flight was to practice instrument approaches and steep turns. I was working on my instrument rating. I preflighted my aircraft following normal procedures. The aircraft was airworthy with no findings of irregularities. I then taxied over to the self serve fuel station and filled the aircraft showing 75 gallons of fuel on board. I then taxied over to pick up Chadd Cross my safety pilot at Hub City aviation. I picked up ATIS, and active runway was 35L. I called ground to obtain clearance and taxi instructions. I was provided taxi instructions to 35L at Foxtrot. I performed my predeparture checklist, all systems were good. I then contacted Tower to obtain clearance for departure on 35L at Foxtrot. I received clearance and proceeded to line up on the centerline on 35L and provided full power as usual. All systems were good, airspeed alive, oil pressure good.

Elevator trim tab was set high and not changed prior to departure. This caused early rotation at 60kts in a nose up attitude immediately upon leaving the runway surface. Stall warning was going off. I was approximately 20' off the ground close to stall speed and the aircraft rotated right, I then over corrected causing the left wing tip to hit the runway. After coming into contact with the runway, I immediately reduced power to land the aircraft without further damage. I exited 35L on Victor and taxied back to my hangar. Initial damage report shows damage to both front & rear spar.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Use pre-departure check list to make sure elevator trim tab is set correctly.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure)
