Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Damage was nose gear - which resulted in a ruptured fuel system. Thus totally destroying the aircraft by fire.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

ON Sept. 24, 2019 I took my nephew (Braden Hartis) and my siste (Samthya Hartis) flying at KEYF (Elizabethtown, N.C.) After arriving at KEYF and preflight the airplane and listening to AWOS. I took off on Rwy 33, made a left turn out to the East towards our home (Riegelwood, NC). After about 30 minutes of flying I started our flight back to KEYF and again listening to AWOS, I elected to use Rwy 33 for landing.

I announced my intentions at 10 miles - 5 miles - 3 miles and upon entering a left traffic pattern. On short final I saw that I was too high by the PAPI lights, I reduced power and lowered the nose of the plane. While doing this, I was telling Braden why I was doing this. I let myself get distracted while talking. (I've always believed ^{in a} Sterile cockpit pilot).

I then realized that I was not at the altitude I needed for landing. I added power + pulled back on the yoke to raise the nose, but I hit and collapsed the nose gear, thus rupturing the fuel system. The plane then continued down the Runway and came to a stop on the grass on the Left side of the runway. Braden and I opened the door and then helped Samthya out of the rear seat. We then went to the grass area on the right side of the Runway. By this time the airplane was totally engulfed in flames.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This accident could have been prevented by not taking my eyes off the runway on approach, thus letting the nose of the aircraft hitting the runway. A Sterile cockpit must always be first priority.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
