NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I, Barry L. Redwood used Foreflight Flight Planning Program to plan this flight from W90 to CRE on 10/01/2019. I had tested the fuel burn twice in past flights to be 3.5 GPH but entered 4.0 GPH in Foreflights Performance area for N95131. I had even taken measured amounts of Fuel to test that the Fuel Tank would hold 12.0 Gallons. I had been planning this flight for about a month.

The updated Flight Planning just before takeoff from W90 including winds aloft showed a flight time of 2 hours 29 minutes with a fuel burn of 10.1 gallons. Moments before takeoff I topped the main 12 gallon fuel tank full into the neck. Planning gave me more than 30 minutes of reserve fuel for the flight.

At 2 hours and 25 Minutes into the flight and 6.1 miles from CRE the engine quit. I was at 1200 feet and picked a field to land in. Because of the tall trees at the beginning of the field, I landed long and was going to run into a 8-10 foot deep ditch or hit a house on the other side of the ditch, so I attempted to ground loop the plane to the left and ran into the edge of the woods striking Two Pine Trees, one with each wing, doing heavy damage to the left wing and slightly less to the right wing, and no obvious damage to the fuselage, Prop or landing gear. The trees and wings absorbed most all of the shock so that I was not injured and the ELT Did Not Activate.

The terrain was flat and the field had just been cleared of its crops and had a slight plowed look.

I departed W90 for CRE at 8:30 am EDT immediately after topping of the 12 gallon fuel tank and Pre-flight. The engine quit at 10:55 am EDT.

I was the ONLY PERSON ON BOARD FOR THIS FLIGHT.

The flight Instruction times for Night Instruction time, Instruction in Actual Instrument and Instruction in Simulated Instrument is ESTIMATED.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Even though the flight planning and prior test flight fuel burn showed that I had the Legal Amount of Fuel for the flight, having a fuel stop would have prevented the accident.
