Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

While I was in the aircraft, stopped in a grass field, I discussed with my mentor, who was standing alongside the aircraft, how best to take off from that field, given certain obstacles that were present, and so I neglected to make an independent assessment of the field conditions. Shortly after commencing the ground roll, I realized that the suggested ground track and flight path were risky, given the obstacles before me, and so I made a ground track deviation. Although I managed to avoid, among other things, a telephone pole, my left wing struck the guy wire of that pole and the aircraft rolled to a stop shortly thereafter, but not before the left wing folded back on itself as it rubbed against a second telephone pole while the right wing encountered the guy wire of that pole. The aircraft was never airborne.
