Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Will not let me select it, but damage was substantial. Composite prop which broke apart upon impact. From baggage compartment back, fuselage is bent and/or broken. Holes in fabric on wings and some control surfaces.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My dad and i were out enjoying the day, i decided to land in this particular area, after examination i knew it would be a soft field landing which i was prepared for. I executed a 3 point attitude landing and performed a soft field landing. It was softer than originally expected, after trying to recover by adding power it was too late and it flipped the airplane upside down on the ground. Due to a miscalculation on my part the airplane ended up flipping onto its back, settling upside down.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Never land in something that you arent 100 percent sure is ok to land on. Know the area you are going to execute your landing and takeoff. If there is any question, do not land. The goal is to execute all flights in the safest possible manner.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
