On October 10th, Corinne Barnes and I did a supervised solo flight for my commercial license. I filed an IFR Flight Plan on ForeFlight before I got to KMGY.

I walked in and got the can from the front desk. Our flight was scheduled for noon. I checked the time on the can to make sure I had enough time for our flight. There was plenty of time for our trip. I went out to preflight the plane, do my walk around, sump the fuel, check the fuel, check the oil, lights, and the rest of walk around. We have full fuel it was topped off and the oil was at 7. Everything was routine and preflight was normal. I walked back in to get Corinne from her office in the fbo. We walked out to the plane. Corinne asked me how much fuel and oil and I told her we were topped off and have 7 oil. Everything looked good on preflight. We got in the plane did run up, and took off. As soon as we started the engine I started the time of the transponder clock, that is where I would keep track of the fuel tanks. Every 30 mins I would switch tanks, it started on left tank. We Picked up our IFR clearance in the air. Flew to KOEB, in Coldwater Michigan. It was only an hour and 10 min flight according to foreflight that day. I did a before landing checklist and landed. We landed in Coldwater at 2pm to have lunch at Prop Blast Restaurant on the airfield. The Restaurant of course closed at 2pm they had just changed their hours and we didn't know. We walked up the the restaurant at 2:08pm. So we went to the restroom and decided to just head back. We walked back to the plane and I checked the fuel again and it was at the tabs, so we had plenty of fuel to get back to KMGY. Before we turned on the plane I filed IFR flight plan on Foreflight on my iPad to go back to KMGY. We did our run up and took off. We picked up our IFR clearance in the air. Everything going back was routine without any issues. Approach gave us vectors around KDAY. Then vectored us for a straight in to runway 20 at KMGY. The last altitude approach cleared us for 2500 and we told them we had the airport in sight and canceled our IFR flight plan. We made a 5 mile call on Unicom. I did our before landing checklist. One of the flight instructors from our school heard my call on Unicom and he asked if Corinne was with me and I said yes and he told us Her student passed his check ride. Right after that is when everything went south. I noticed we looked low so I added power. Nothing happened so I went full throttle. Nothing happened. I moved the throttle back and fourth to make sure there was no dead stop in the engine. I said corrine throttles, she moved them back and fourth. We both looked ahead and we said we wouldn't make the runway we were still to far and sinking fast. I said cornfield we turned left. My hand stayed on the yoke but Corinne took more control. I squawked 7700. She pulled back on the yoked to slow us down to and attempt to maintain altitude to clear power lines. After clearing the first set of powerlines, we knew we wouldn't make the corn field and decided to land on the road near an intersection. I said for us to push forward not to stall and to clear the powerlines and traffic lights that were above the intersection. Corinne pushed the yolk down and we touch down on the ground just before the the intersection and in the split second we clipped the back of a BMW on the left. After clipping the bmw we came to a full stop. We both climbed right out of the plane and ran to the car to make sure the car was ok. He was fine and we were fine.
