NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After taking off from 23TA (where the airplane is hangared) I flew to Rockwall (F46), to I meet a pilot friend. Together, we departed F46 towards the Northeast, to fly in the pattern at GVT airport. The tower at GVT is usually closed on Saturdays, which we verified by making calls on 118.65 which went unanswered. Traffic was light, and we determined that Runway 35 was being used. Making position reports on 118.65, we entered a left downwind for runway 35. The first landing was normal, but towards the end of the next landing, during the last, slow phase of rollout, there was a very strong pull towards the right, turning the aircraft towards the eastern edge of the runway. While veering around to the southeast, the aircraft departed the runway, the left wing hit the ground, and the engine stopped. Both master switch and fuel selector were turned off quickly, and we exited through the passenger side door.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Note

My activity as pilot examiner and flight instructor require that I be highly proficient flying from the right seat, always prepared for a last-minute taking over of the controls when a student or check ride applicant performs in an unsafe manner. In order to maintain this level of proficiency, all my personal flying is conducted from the right seat.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
