Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Forward carry through wing spar separation, port wing tip and leading edge impacted ground, prop struck ground as did port engine cowling, general twisting of fuselage and empennage. Underwriter covered full value.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

- At Sonora I fueled N2585 to full capacity (24 gallons) with 17 gallons.
- Departed KSOA at ~06:36 central for KLVJ via KHYI then 29°19'N 096°04'W (Wharton)
- En route from KSOA to KHYI winds were ~4mph WSW then clocking ENE at ~6mph at KLVJ.
- Upon descending to 2,000ft and crossing TX-288 ~2.5NM south of course the engine began to run rough followed by intermittent operation then it quit entirely.
- The unexpected engine behavior spanned ~5 minutes.
- Options I considered for a forced landing were TX-6, then Martha's Vineyard subdivision grass along the street that I selected.
- I had driven TX-6 and knew power and signal lighting wiring frequently crossed the highway. Also, light to moderate traffic was a concern.
- I was aware that heavy rain had soaked the area the prior area the prior day and I did not know the surface condition of the grass.
- The challenges as I attempted the landing included the high power lines to the west of the street which required a steep descent (no slipping available in this 415C).
- During the high speed flare I noted the port wing was close to clipping ~~the~~ a street light pole so, I drove the yoke right.
- A hard landing ensued and hard braking was applied (no directional braking in this 415C).
- During the maneuver right that wheel hit the curb and the right wing grazed an obstruction (I believe it was a mud fence post and not the fire hydrant).
- Upon seeing a second light post approaching the right wing I drove the yoke left.
- At this point the aircraft had enough and it performed a ground loop which ultimately stopped the forward motion.
