NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We were conducting cross country flight training, originating from Riverside airport with the final destination to be North Las Vegas airport. This particular leg of the flight originated from Bullhead Airport (KIFP) with a stop Overton/Perkins airport and then on to North Las Vegas. We departed around 2:30 Pm local time from Bullhead airport. We departed north following the river towards Overton/Perkins. Prior to reaching Overton I intended to conduct some off-airport training in the riverbed. I selected a site and instructed my student to shoot a normal approach to the sandbar in the riverbed to a landing spot. Approach was to the south from the north with about a 20-25Kt wind from the south. At about 20 ft or so above the surface I took controls and initiated a go around. I turned us left into a crosswind continuing the climb and acceleration. Continuing the left-hand turn facing us north which put us into a tailwind. We started to descend heading North. I was unable to maneuver the aircraft back into the wind. Aircraft continues to descend still flying northbound. Aircraft was unable to produce enough lift and airspeed with maximum available manifold pressure. Aircraft contacts ground with slight bounce up a few feet off the ground. Continuing to attempt to slow and control descent, aircraft yaws slightly to the right and contacts ground again and rolls onto the left side. Main rotor blades strike ground under power causing the engine to stop after ground contact. We contact the ground around 4:20 to 4:30 pm local time. No persons were injured or hurt. No other aircraft involved and no mechanical failures. Both pilots exit aircraft on pilot/right side. I pull mixture shut off switches and close fuel valve.
