Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Landing gear broken off, nose gear collapsed, significant damage to lower portion of airframe and skin, wrinkled wing skin, two prop strikes on left mains tire, propeller shattered, severe damage of tail and stabilator, belly antennas broken

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Accident occurred during takeoff from L41 at 2:11 PM MST October 18 2019. During initial takeoff roll on runway 21, wind sock showed very little wind, perhaps 5 knots. Midway through the takeoff roll, a gust came up which caused the aircraft to depart the runway. Flying speed was not achieved, and the airplane proceeded through sand hummocks and rocks until both landing gear legs were broken. The left gear was struck twice by the propeller. The impact of the propeller flung the left gear West about 60 feet. The aircraft came to a stop skidding on its belly in the sand.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Best practice is to avoid this field, due to narrow width and highly variable wind conditions.
