

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Safford State: AZ

ZIP: 85546 Country: USA

Latitude: 32 41 37.86 Longitude: 109 41 25.16

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 10/19/2019 Local Time: 5:30
mm/dd/yyyy

Time Zone: Pacific

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N3784A

Manufacturer: Ronald V. White

Model: CH701

Serial Number: 5319

Year of Manufacture: 2008

Amateur-Built: ☒ Yes ☐ No If Yes: ☒ Kit/Plans ☐ Original Design Make: Ch-701

- ☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 1320 lbs

Weight at Time of Accident/Incident: 1210 lbs

Number of Seats: 2 Flight Crew Seats: 1

Cabin Crew Seats: 0 Passenger Seats: 1

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Landing gear broken from plane, with rear fuselage landing on right main wheel, and suffering bending/damage. Nose wheel also bent back. both wing tips slight damage. Wings/struts not damaged. Engine mount bent with top tubes busted.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departure from SAD at approx. 1645, for a pleasure flight. Flight West of Safford over and circling E37., flight between 1000' and 1500' MSL. Then turn South East, then straight for approx. 15 miles. Then, a 270 deg. right turn, 1/2 mile East of Accident location, around the Saint Paisius Monestary. The plane was approximately 1200' MSL at this point. Established level cruise at 75MPH.

After leveling off, we were headed northbound for return to Safford airport (SAD). A severe and instantaneous vibration began. The pilot removed power, and established glide, while looking for emergency landing spot. The pilot made a 90 deg. turn to the West in an effort to reach Stockton road for an emergency landing. The pilot was unable to reach Stockton road, landing approximately 40 feet short of the road, in a wash. The wash was very soft, and rough sand. The landing gear was immediately broken from plane, and the plane slid to a stop in the sand.

Total flight time was 45 minutes.

The passenger was Randy White, also a private pilot. Randy believes he saw "something black streaking from the right, into the prop" just before the extreme vibration occurred. He did not believe it was a bird, rather thinking it was a drone, but could not be sure. The pilot was looking out the left window just prior to the significant vibration, and did not see anything hit the prop. There is no blood or feathers on the remainder of the prop or airplane.

A significant portion of the prop was not found at the accident area.

I believe the cause of the accident was a drone strike. Although, I can find no evidence of the drone.

I did go out and search the desert a few days after the accident, using the handheld GPS and my left turn to Stockton road as a starting point for a search. I found a few small pieces of the prop in a mesquite tree, several hundred yards back, along the flight path. However, this was still not all of the prop pieces that are missing. There was significant recent motorcycle and foot prints all around the area where I found the prop pieces. It is my belief the owner of the drone had gone out to the area, before I did, and cleaned up the drone and the remainder of my prop.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

After reviewing the accident area, there were a few areas in the desert that would have supported a landing, potentially with less damage. The Zenith 701 is designed as a STOL aircraft, and can land very short, when landing under power. However, the STOL design results in a very draggy airplane, which did not glide as well as expected without power. So while I initially fully expected to make the road, I ended up short. Had I Landed in one of the clear areas in the desert, rather than the wash where I ended, I probably would have sustained some other damage. Those areas are flat, but there are some tree's and cactii, ruts, etc., however I expect the damage may not have been as bad.

I fully expected to make the road, which would have prevented damage, but I overestimated glide performance.

In hindsight, I should have spent more time with the plane at idle, understanding the glide performance. Because the 701 was so draggy, landings are done with power. Approach, etc. are all flown with significant power. If I had spent some time learning how the plane performed with no power, I may have chosen a different landing spot, and possible received less damage.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)
