NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Airman Questions**Events of flight**

I departed Deadcow Airstrip on Sunday morning, October 20/2019. I flew north to land at lookout point. It was sunny and calm on lake bed with light wind higher up. I flew to the intended landing spot to make sure all was clear. I had landed there 2 days earlier with no problems. The landing area was clear. The breeze was a quartering tail breeze at 5 mph as indicated by my gps. Came around and line up for landing. Touched down are intended spot and stall horn had started which means I was lower than 50 mph. I began the roll out and applied brakes. There is a bump running across landing area. The mains rolled over smoothly. When tail went over it pitched the tail up and with little speed, elevator was ineffective. Prop struck ground causing a quick slow down and with the momentum left, the tail went over.

Terrain was mountain top with small rock, dirt and a little bit of vegetation.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I felt like proceeded safely & cautiously. I flew by landing area to make sure all was clear. Did a long slow approach. Had a target to hit and a go around spot. Speed was perfect as stall horn was on just before touch down. It is set to start beeping 10 mph above actual stall. Rollout was a bit bouncy but not extreme.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
