Left side wingtip damage
Nose gear damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

This was my fifth time doing lesson Commercial 14 (Solo time-building). I departed GYI at 12 pm local for my XC flight to KJDD. I did one landing at KJDD and then returned to KGYI.

I entered the left downwind for runway 17L at GYI. The controller told me to continue on downwind and that he will call my base turn. When I turned base to final, I determined my altitude was very high, so I over pitched down and reduce power to idle.

During my flare, the airplane stayed in ground effect and ballooned. To correct, I pitched down a little and the airplane bounced on the ground about 20 feet. The airplane bounced two or three times. After that, the airplane just stopped on the runway after sliding forward and ended up with a tail up attitude and resting on the left wingtip as well.

Then, I called the tower and told them about a nose gear collapse and they asked about my personal condition. I replied I was okay. Somebody came on frequency and told me to cutoff the mixture, throttle, and turn off magnetos.

After that, I got out through the left door easily. Then, I walked away from the airplane and met Katie (GYI) instructor who was already walking towards me.
