NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Pilot performed pre-flight at TWF, Hangar #4. 20 gallons fuel was added at pilot request. Intended destination was U87 (Smiley Creek) with multiple stops along the way. First full stop landing was planned for JER. Pilot received takeoff clearance with right turn departure. A Skyhawk called the TWF tower as pilot was making initial right turn from takeoff. Incoming Skyhawk pilot reported location and altitude but was not visible to me. Climbout was normal. I performed engine checks and prop sync. I was cleared to change frequencies by the TWF tower as I reported crossing the Snake River to the north. I checked JER ASOS and planned on using Runway 27. I reported approach positions to the JER CTAF, left downwind, base and final approach. I had a checklist in my lap but was distracted from using it. At final flight point I was aware that the aircraft was abnormally low and should have touched the gear by then. At that point the aircraft contacted the runway, settled fully onto the belly and slid to a stop at midpoint of the runway. I closed fuel valves, shut off the master switch and exited the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)
