NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Ryan Airfield Ground Control was contacted early afternoon 2-21-2013 (with AWOS Bravo) requesting to stay in the pattern for two full stop landings. This was approved after a change in wind and runway (33). After run-up, Tower and the two landings were made without incident. A request was then made to leave the pattern to the Northwest. A local flight over El Toro sailplane airport with return to KRYN. The Tower was contacted 10 miles out. A "left downwind to RW33, report 2 miles" was acknowledged. Tower then requested N223PE to continue via Sandoval Road to base leg. An inbound BONANZA with a Chinese accent had reported inbound but not in sight. N223PE was called for baseleg, cleared to land #1. The Bonanza was designated #2. Landing was uneventful and rollout was quickend to make the first turnoff. The tailwheel and rudder started to shimmy. Slight forward yoke pressure was applied to ease the shimmy, Brakes were applied gently to make the exit, the craft lurched forward with a lot of noise, inverted on the runway. I found myself suspended in the harness, pain free, but crushed, realizing what had occurred.

The left door was opened easily, The wonderful harness was released and I crawled out onto the inverted wing to the tarmac. Within minutes three tenants ran over followed in several minutes by airport police, AMTS & ambulance. Barnett's Towing did a great job righting the aircraft and returning it to the hanger. The Tower Controller came to the site to check on me which I appreciated. Contact with the Bonanza via the tower or visually was never made.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

- 1.By increasing yearly Flying Time
- 2.By flying with your Instructor more often
- 3.Awareness of other faster traffic could be enhanced

Don Ewing
