NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

8713U did a pre-flight check of the airplane at the hanger. Runway 11 was the active runway so he taxied to the run up area to do his take-off checklist after he completed the checklist he taxied closer to the entrance of Runway 11. He heard a plane calling in base for 11 so he waited there for the airplane to land before continuing to entire the active 11 Runway.

As he was waiting there 8713U heard a loud noise and felt movement of the airplane. He knew something just hit him but he couldn't see what. He shut down the engine and got out of the airplane and saw N881RW facing North - N8713U was facing west.

Richard Williams Pilot of N881RW was out of his plane and stated that he was doing s turns down the taxiway and did not see 8713U until the last minute when he turned quickly trying to miss the plane with his prop. N881RW hit 8713U's Left Rudder and Vertical Stabilizer with his left wing tip. Tipping the Vertical Stabilizer to the right; twisting and buckling the fuselage to the back windows.

There was a witness to this accident Mark Lessor Pilot of N968SW.
