Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Approx. 1530 - 1600 MTN We departed from Casa Grande, AZ. Before leaving we topped off both fuel tanks. About an hour into flight the sun went down. Our intended airport was North Las Vegas. I believe our cruising altitude was 9500 MSL. I fell asleep and woke up a few times during the flight but as we approached Boulder City I was awake. McCarran Approach began a stepdown descent to 8500 MSL - 8000 MSL down to 6500 MSL and then 6000 as we were over Henderson. All phases of the flight were normal until we got to 6000. At this time the engine died out, it sputtered and died. We tried to restart. Both fuel gauges indicated slightly over $\frac{1}{4}$ tank in each tank. The engine didn't start. Trans advised McCarran Approach of the situation and we started looking for a place to land. McCarran Approach advised us of ~~fields~~ 6 miles and 5.5 miles away which we couldn't make. We were directly over a neighborhood

Operator/Owner Safety Recommendation

As I am unaware as to why the engine quit on us I am unable to make a recommendation on this portion at this time. As for other phases of the incident we were both calm and knew and followed proper emergency procedures to find an ~~unpopulated~~ ^{unpopulated} area in order to preserve life and property as best we could.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

So we turned left toward a well lit freeway. It wasn't a viable option due to the traffic on the freeway, then to our left we saw a dark patch of land and decided that would have to work, as we were losing altitude quickly. Travis turned to the patch of land, as we approached I advised him of electrical towers and power lines, we came in too fast, overshot our intended landing spot, Travis tried to turn around but the stall horn went off about 15-20 feet off the ground. so he reconnected his turn toward a small piece of land in a construction site. Our landing gear then clipped a fence and ~~we~~ turned the plane to the east as we hit the ground on the belly of the aircraft. When the aircraft stopped we checked each other quickly and exited the plane. I noticed Travis' face covered in blood from a cut over his eye. Once I was out of the plane I called 911 and stayed on the phone until emergency personnel arrived. We moved away from the aircraft because the engine was leaking some kind of liquid. Our landing gear was spread out throughout the site. Travis went to the hospital due to his injuries I didn't as mine were very minor.
