

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Gaston State: OR

ZIP: 97119 Country: USA

Latitude: 45 27'53.33" Longitude: 123 11'03.16"

(Enter in decimal degrees or degrees minutes seconds)

Accident/Incident Date/Time

Date: 07/03/2014 Local Time: 8:05am
mm/dd/yyyy

Time Zone: P

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: 684PC

Manufacturer: Bell

Model: 47

Serial Number: 6744

Year of Manufacture: 1969

Amateur-Built: ☐ Yes ☒ No *If Yes* ☐ Kit/Plans ☐ Original Design Make: _____

☐ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 3200 lbs

Weight at Time of Accident/Incident: 2500 lbs

Number of Seats: 3 Flight Crew Seats: 1

Cabin Crew Seats: _____ Passenger Seats: 2

Number of Engines: 1

Category of Aircraft

- ☐ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☒ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
- ☐ Aerobatic
- ☐ Balloon
- ☐ Commuter
- ☐ Transport
- ☐ Utility

Special

- ☐ Restricted
- ☐ Limited
- ☐ Provisional
- ☐ Special Flight
- ☐ Experimental
- ☐ Special Light-Sport
- ☐ Experimental Light-Sport

☐ Certificate of Authorization or Waiver (COA)

☐ None

☐ Unknown

Landing Gear

(Check all that apply)

☐ Retractable

- ☐ Tricycle
- ☐ Amphibian
- ☐ Emergency Float
- ☐ Float
- ☐ Hull
- ☐ Other Launch/Recovery System
- ☐ None
- ☐ Tailwheel
- ☐ High Skid
- ☒ Skid
- ☐ Ski
- ☐ Ski/Wheel
- ☐ Unknown

Engine Type *(Select one)*

- ☐ Reciprocating
- ☐ Turbo Shaft
- ☐ Turbo Prop
- ☒ Turbo Jet
- ☐ Turbo Fan
- ☐ Electric
- ☐ Liquid Rocket
- ☐ Solid Rocket
- ☐ Hybrid Rocket
- ☐ None
- ☐ Unknown

Fuel System Type *(Reciprocating)*

☐ Carburetor ☒ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. <i>mm/dd/yyyy</i>	Rated Power ☒ Horsepower or ☐ lbs of Thrust	Total Time <i>(hours)</i>	Time Since: Inspection <i>(hours)</i>	Overhaul <i>(hours)</i>

☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The fuselage, engine, transmission, frame, tail boom, Main rotor, tail rotor, landing gear, and most of the other parts on the aircraft were damaged beyond repair as a result from the impact with the ground.

One pickup had a piece of the rotor system go cleanly through the windshield and rear window destroying the glass.

Another pickup had a front passenger window broken out and dents on the passenger side from gravel being thrown by the rotor system after contact with the ground.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I work for a company that does Aerial application and on the morning of July 3rd I was scheduled to do a mosquito control application near Hagg Lake in Gaston Oregon beginning at 8am. At 7:35 I left the shop in Newberg, OR and flew to the location of the application which was a mill pond at a lumber mill. I arrived on location at about 7:50am and shut down the aircraft because I had to wait for my ground crew to arrive with the application equipment which is a bucket with a hydraulic gate and spinner for dispersing the granular mosquito bait (like a grass seed spreader just on a larger scale). Once the ground crew arrived we attached the bucket, the lead crew member crawled under the aircraft to attach both the hydraulic lines and straps from the right side and I plugged in the power cable on the left side. The straps are connected to the helicopter by a cargo hook that is under the center of the aircraft. The straps are about 12 feet long. The lines and straps are connected in a fashion so they can be disconnected by the pilot in an emergency. We checked to make sure those emergency features worked properly and everything was connected correctly. I then walked around to the right side of the aircraft and adjusted the pressure of the hydraulics and plugged in the pump. After looking over the entire aircraft it was time to start the aircraft to make sure everything was working correctly. Once the ground crew was clear I started the aircraft and began the checks. We found that the bucket was working correctly so the ground crew filled the bucket with bait which was eleven 40lb bags. Once the bucket was full the lead ground crew member walked around both sides of the aircraft and bucket checking for anything that might be wrong or out of place. The other ground crew members retreated to the front of the pickup which was sitting about 20 feet in front of the bucket. The bucket was about 2 feet in front of the helicopter. After the lead ground crew member looked everything over he gave me a thumbs up and retreated to the front of the bucket. I returned the gesture and began to idle the aircraft up to 100% to prepare for takeoff. I took the friction off of the controls and turned the main hydraulics on. I looked around the aircraft and made sure everything looked in place and everyone was clear. I began raising the collective and saw the lead crew member further retreating to the side of the pickup so I moved my focus to the mirror on the left skid which allows me to see the bucket once I get high enough over it but almost immediately after I got over the bucket height the helicopter started moving forward and I began to apply aft cyclic. I was also having to apply left peddle but the helicopter continued to move forward and at this point I was approaching the pickup so I had to move the helicopter to the right a little bit so I would clear it and the crew members seeking refuge around it. The helicopter progressed out of my control very quickly and I was applying full aft cyclic and left peddle but it was only moving forward faster. The thought that went through my head was something wasn't right in the controls. I was able to move the helicopter over to the side of the pickup as it began to have a drastic nose down attitude. I could see the ground getting closer and at this point I had little control of the aircraft. It impacted the ground with a slight right yaw and down attitude which caused the left front skid to hit first. After the aircraft stopped I could see fuel running under me and hear the engine running too so I turned the throttle off and unhooked my seat belt. At this point the lead crew member came over and helped me exit the wreckage.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I think the accident might have been prevented if I would have raised the collective a little slower.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
