

**NATIONAL TRANSPORTATION SAFETY BOARD
PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT**

This form to be used for reporting civil and public use aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Hazleton State: Id
 ZIP: 83341 Country: USA
 Latitude: 42 35'41"N (dd:mm:ss N/S) Longitude: 114 8'12"W (ddd:mm:ss E/W)

Date/Time

Date: 07/28/2014 Local Time: 3:00pm
mm/dd/yyyy Time Zone: Mtn

Phase of Operation

☐ Standing ☒ Takeoff (incl. initial climb) ☐ Cruise ☐ Hover
☐ Taxi ☐ Climb ☐ Maneuvering ☐ Other
☐ Descent ☐ Landing ☐ Approach ☐ Unknown

Collision with Other Aircraft

☐ Midair
☐ On-ground
☒ None

Altitude of In-Flight Occurrence

_____ ft MSL

AIRCRAFT INFORMATION

Manufacturer: AirTractor

Model: 802A

Serial Number: 802A-0556

Registration Number: N802TY

Amateur-built: ☐ Yes ☒ No

Max Gross Weight: 16,000 lbs

Weight at Time of Accident/Incident: 14,123 lbs

Location of Center of Gravity at Time of Accident/Incident:

27.4 inches from ☐ nose or ☒ datum
 -or- _____ Percent Mean Aerodynamic Cord (% MAC)

Category of Aircraft

☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyrocraft
☐ Helicopter
☐ Powered lift
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate
(Check all that apply)

Standard

☐ Normal
☐ Utility
☐ Acrobatic
☐ Transport

Special

☒ Restricted
☐ Limited
☐ Provisional
☐ Experimental
☐ Special Flight
☐ Light Sport

Number of Seats: 1

If Large Aircraft, how many seats for:

Flight Crew: _____

Cabin Crew: _____

Passengers: _____

Landing Gear ☐ Retractable

Check any additional landing gear configuration that applies:

☐ Tricycle ☒ Tailwheel
☐ Amphibian ☐ High Skid
☐ Emergency Float ☐ Skid
☐ Float ☐ Ski
☐ Hull ☐ Ski/Wheel
☐ Unknown

Type of Maintenance Program

☒ Annual
☐ Conditional (Amateur-built only)
☐ Manufacturer's Inspection Program
☐ Other Approved Inspection Program (AAIP)
☐ Continuous Airworthiness
☐ Other, specify: _____

Last Inspection Type

☒ 100 Hour ☐ Continuous Airworthiness
☐ AAIP ☐ Conditional Inspection
☐ Annual ☐ Unknown

Date Last Inspection: 07/15/2014

mm/dd/yyyy

Airframe Total Time: 305 hrs

hours measured at (check one)

☐ Last Inspection ☒ Time of Accident/Incident

IFR Equipped

☐ Yes ☒ No ☐ Unknown

Stall Warning System Installed

☒ Yes ☐ No ☐ Unknown

Type of Fire Extinguishing System

☐ None
☒ Specify Fire extinguisher under seat

ELT Installed

☐ Yes ☒ No

ELT Activated

☐ Yes ☐ No

ELT Manufacturer: _____

Model/Series: _____

Serial Number: _____

Battery Type: _____

Battery Exp. Date: _____

Engine Type

☐ Reciprocating ☐ Turbo Jet
☐ Turbo Shaft ☐ Turbo Fan
☒ Turbo Prop ☐ Unknown

Reciprocating Fuel System Type

☐ Carburetor
☐ Fuel Injected

Propeller

☐ Fixed Pitch
☒ Controllable Pitch

Manufacturer: Hartzell

Model: HC-B5MA-3D/M11691NS

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Engine Rated Power Measured as (check one) ☒ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since Inspection (hours)	Time Since Overhaul (hours)

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

On my 16th load of the day at Hazelton airport around 3:00pm this accident occurred. I had been hauling 70 more gallons per load on the previous 15 loads. I believe that a down draft weather condition existed at the time of the accident or a wind switch occurred. Of the 15 prior loads runway 06 was used on about 10 loads and runway 24 on the others. On the accident load the wind indicator at our load site showed N.E. at 4-5 kts so I elected to use 06. Looked at the wind sock on the back taxi and couldn't see exactly which direction it showed as the wind sock mechanism does not function properly. On the takeoff roll everything seemed normal when the tail wheel came up, but during takeoff rotation the airplane did not want to lift. I applied full flaps but it still would not lift as it should. Next I jettison the load. This airplane is equipped with a dump system that drops the whole load. The entire load emptied out. At this point the nose pitched up, I pushed forward on the stick in anticipation of the nose pitch but could not prevent a steep angle of attack and the airplane stalled. The airplane impacted the ground nose first.

As a side note the air in our area can be tricky to fly in. The Saturday before the accident I was hauling light loads of dry fertilizer off the same airport. On two loads I had a down draft right about mid-field hit me. On the first occurrence I thought it was a little whirlwind coming through, but when it happened on the second load I elected to shut down for an hour or so until condition changed. Now mind you that Saturday we had basically clear skies and nothing that would have indicated any kind of strange weather occurrence. On the day of the accident the majority of the day we had overcast skies that had just lifted prior to the accident. I talked to a local farmer whom I had never meet before that told me he hit a down draft with his tractor just east of the accident at a time frame he figured to be just after the accident happened. Last year I got in a down draft 7 1/2 miles north of Jerome in a basically empty airplane. I was spraying a field along a big electrical transmission line. During the cleanup passes I went up over the line on the west side of the field and did a turn to the right for 180 degree turn to the south. At that point I hit the down draft and thought I was going to end up in the line. The down draft was so violent that the shoulder harnesses bruised me and my helmet slammed into the cockpit roof. Luckily it let me go right before I hit the line and I was able to pull up. Should it not have nobody would have ever know what happened. That was also a clear sunny day.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

I attribute this accident to an unusual weather condition that could not be foreseen.

The jettison of the load with the big gates on these airplanes make it very hard to control the plane. I have done practice dumping with water several time at higher airspeeds and full anticipation with controllable results. Even under these condition it works the pilot. I also practiced fully dumping fertilizer which are easier to control but the airplane wants to lift fast. At slower speeds associated with this accident the airplane was virtually impossible to control. In the future I will figure out a way to only partial open the gate though the hydraulic gate system and also prevent accidental dumping with said system.

Last year I did over 1400 takeoffs and look forward to continuing that many for years to come.
