Description of Damage to Aircraft and Other Property (Use additional sheet if necessary) Rotor Blades struck ground destroying rotor blades. Dented fuselage, shattered plexiglass. Tail boom twisted and bent. Broken sprinkler pipe - (Farmer)					
NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)					
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.					
While conducting aerial application operations, I had landed in a planted field that had irrigation sprinkler pipes arranged in the field rows. Later upon takeoff and forward movement to reposition the helicopter at the loading truck, the right spray boom snagged one of the sprinkler head risers which caused dynamic rollover to the right. The main rotor blades struck the ground on the right side of the helicopter, and the helicopter came to rest on its right side.					

RECOMMENDATION: How could the accident/incident have been prevented?

Operator/Owner Safety Recommendation

Remain familiar and cautious of the position and layout of irrigation pipes that we operate and land close to on farming ranches during our aerial application operations.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)
