Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Nose gear broken off. (A) window broken, Prop broken. Window scratched
 (R) main gear damaged. Possible bent frame.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Departed 1200 0910 for KWHF near Burbank Ca. Tanks were checked and full (36 gallons.) Estimated flight time 3 hr, estimated fuel 6 hr. ~ 20 miles south of Bakersfield while climbing to 7500 ft over the Grapevine, noted (A) fuel gauge showed 0-6 gallons, (R) 3-8 gallons. Readings were fluctuating - it was pretty bumpy. I turned back toward Bakersfield. Shortly both gauges showed minus 0.3 gal. I declared an emergency to Bakersfield approach and was vectored first to a private field that I wasn't able to see, then to Bakersfield Municipal, 10 miles north. En Route I was told that the airport was closed. I was allowed vector to Meadows, 12 miles further and across the city. I decided to land at Bakersfield Muni and circled over the field while maintenance vehicles cleared the runway. Then I landed on RWY 34, too high despite a slip and S-turn. I landed on the runway but rolled off the end and ran into the airport fence (chain link). The plane was damaged but no one was hurt. The A and P mechanic (Armando Hernandez) who later moved the plane told me the left tank was near full.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Diagnose and repair the malfunctioning fuel gauges/sensors.

Practice precautionary and simulated engine out landings with instructor.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
