

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Pine Bluffs State: WY

ZIP: 82082 Country: United States of America

Latitude: 41:09:09 Longitude: 104:07:46

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 08/13/2014 Local Time: 11:50 AM
mm/dd/yyyy

Time Zone: Mountain

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N2830X

Manufacturer: Cessna

Model: 177

Serial Number: 17700230

Year of Manufacture: 1967

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

- ☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 2350 lbs

Weight at Time of Accident/Incident: 1851 lbs

Number of Seats: 4 Flight Crew Seats: _____

Cabin Crew Seats: _____ Passenger Seats: _____

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller strike, buckled fuselage, bent nose wheel, damaged firewall, hard landing

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed from Gillette Campbell County Airport (KGCC) at approximately 9:50 AM Mountain Daylight Time. The flight from Gillette was relatively smooth and problem free. After two hours of flight time I arrived at Pine Bluffs Municipal Airport (K82V). After listening to the AWOS I entered a left downwind approach for runway 26. The wind was 190 @ 10 knots gusting to 20 knots. Everything seemed like a normal crosswind approach up until the landing flare. I was flaring the airplane and was about to touch down when suddenly I experienced what I believe was either severe wind shear/or a dust devil. It lifted the aircraft about 20 to 40 feet then switched to a tailwind and stalled the plane. The right wing dropped and the plane entered around a 45 to 60 degree bank to the right while stalled. I managed to correct the bank angle and almost break the stall, but impacted the ground with the nose wheel and propeller before I could fully recover. The aircraft bounced up off the runway after the impact and eventually settled down. I brought the aircraft to a stop and then got out to inspect the damage. The propeller was damaged substantially, the firewall was buckled, the nosewheel was bent, and the fuselage was also bucked.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Wind shear and dirt devils are difficult to predict and can cause very dangerous situations. If you don't fly during hot weather they may be less of a risk. I also feel that perhaps if I was able to push the aircraft power to full throttle it may have been possible to break the stall. Although when you are rapidly lifted 20 to 40 feet above the ground and then stall it is very difficult to react fast enough to recover. I suggest that people practice recovering from stalls in a very very small amount of altitude and practice reacting quickly. I also feel that pilot's should be aware of the fact the weather events can occur very rapidly and without much warning. Be ready to react quickly. The wind was also coming from the south and gusting to 20 knots. The aircraft was lifted up during the landing flare near the opening between two hangers to the south. It may be possible that the wind was coming from a direction that allowed it to be funneled and increased in speed between the gap in the hangers. I think that being cautious of obstructions that could potentially cause a hazardous situation would also be wise.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
