NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Winds were approx. 050 @ 010 kts. Landing configuration, 20 deg. flaps, engine @ idle, normal 3 point landing, aircraft in control to about 15-20 mph. At that time, I heard what sounded like a tire going over a hot spot, then the A/C became squirrely. Corrections were made including full left rudder. Control surfaces had no effect on the direction or quality of motion. A/C wind milled, LH landing gear collapsed and A/C came to a stop. There was not enough force during landing or rollout and subsequent collapse to push us against our seat belts.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Uncertain at this time.

ADDITIONAL INFORMATION (Please type or print in ink)
