

NATIONAL TRANSPORTATION SAFETY BOARD
PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT
 This form to be used for reporting civil and public use aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: FORT MOHAVE State: AZ
 ZIP: 86426 Country: USA
 Latitude: 3500.34N (dd:mm:ss N/S) Longitude: 114 33.90W (dd:mm:ss E/W)

Date/Time

Date: 04/21/2014 Local Time: 2:00 PM
 mm/dd/yyyy Time Zone: MST

Phase of Operation (go-around)

☐ Standing ☒ Takeoff (incl. initial climb) ☐ Cruise ☐ Hover
☐ Taxi ☐ Climb ☐ Maneuvering ☐ Other
☐ Descent ☐ Landing ☐ Approach ☐ Unknown

Collision with Other Aircraft

☐ Midair
☐ On-ground
☒ None

Altitude of In-Flight Occurrence

300 ft MSL

AIRCRAFT INFORMATION

Manufacturer: Piper

Model: PA 30

Serial Number: 30-965

Registration Number: N7880Y

Amateur-built: ☐ Yes ☒ No

Max Gross Weight: 3600 lbs

Weight at Time of Accident/Incident: _____ lbs

Location of Center of Gravity at Time of Accident/Incident:

-or- _____ inches from ☐ nose or ☐ datum
 Percent Mean Aerodynamic Cord (% MAC)

Category of Aircraft

☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyrocraft
☐ Helicopter
☐ Powered lift
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate
 (Check all that apply)

Standard

☒ Normal
☐ Utility
☐ Acrobatic
☐ Transport

Special

☐ Restricted
☐ Limited
☐ Provisional
☐ Experimental
☐ Special Flight
☐ Light Sport

Number of Seats: 6 (4)

If Large Aircraft, how many seats for:

Flight Crew: _____

Cabin Crew: _____

Passengers: _____

Landing Gear ☒ Retractable

Check any additional landing gear configuration that applies:

☒ Tricycle ☐ Tailwheel
☐ Amphibian ☐ High Skid
☐ Emergency Float ☐ Skid
☐ Float ☐ Ski
☐ Hull ☐ Ski/Wheel
☐ Unknown

Type of Maintenance Program

☒ Annual
☐ Conditional (Amateur-built only)
☐ Manufacturer's Inspection Program
☐ Other Approved Inspection Program (AAIP)
☐ Continuous Airworthiness
☐ Other, specify: _____

Last Inspection Type

☐ 100 Hour ☐ Continuous Airworthiness
☐ AAIP ☐ Conditional Inspection
☒ Annual ☐ Unknown

Date Last Inspection: 09/12/2013

mm/dd/yyyy

Airframe Total Time: 5235.3 hrs

hours measured at (check one)

☒ Last Inspection ☐ Time of Accident/Incident

IFR Equipped

☒ Yes ☐ No ☐ Unknown

Stall Warning System Installed

☒ Yes ☐ No ☐ Unknown

Type of Fire Extinguishing System

☐ None
☐ Specify: _____

ELT Installed

☒ Yes ☐ No

ELT Activated

☐ Yes ☒ No

ELT Manufacturer: _____

Model/Series: _____

Serial Number: _____

Battery Type: _____

Battery Exp. Date: _____

Engine Type

☒ Reciprocating ☐ Turbo Jet
☐ Turbo Shaft ☐ Turbo Fan
☐ Turbo Prop ☐ Unknown

Reciprocating Fuel System Type

☐ Carburetor
☒ Fuel Injected

Propeller

☐ Fixed Pitch
☒ Controllable Pitch

Manufacturer: Hartzel Control Pitch

Model: HC-EZYL-2BS

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Engine Rated Power Measured as (check one) ☒ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since Inspection (hours)	Time Since Overhaul (hours)

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

April 13, 2014

My wife and I were flying into Lake Havasu City, AZ (HII) from Sun Valley Airport (A20) to visit friends.

While turning final the manifold pressure gauge suddenly dropped and then went back up just as suddenly, as we continued on final approach the (L) engine failed, on short final the (R) engine failed. Both propellers went into feather.

We continued until we could land and stop. At that time I tried to restart the engine, but they would not start. we called Desert Skys to tow us. They towed us to their parking area, they do not have a mechanic. I tried again to start the engines and get the propellers out of the feather position. I finally did get the (R) engine started. The throttle was in the off (down) position and the engine was screaming as if in full power. I shut it down, again the prop went into feather.

Desert Skys told us that there was a mechanic shop next door, but were not open on Sundays (Arizona Aircraft Maintenance) we left the plane there. We returned on Monday morning to speak to the mechanic and tell him what happened. Mark the mechanic took the airplane into his shop and looked at it, proceeded to get two boards and twist the props out of feather position. While they were doing that my wife and I went to breakfast, when we returned the plane was already in transient parking which surprised me that they finished so quickly, I went to the office and the man there stated that the mechanic had run it up and it was "ready to go" "all is good" since Mark was not there we could not speak to him, my wife asked them several times "what would cause that to happen"?? they said they "did not know". We went to the airplane, at that time I noticed the props were not in their usual position after running, I mentioned that to my wife. I did not think they had done a run up, I started the (R) engine and the same thing happened the throttle was in the down position and it was screaming and the prop back into feather. The workers at the shop heard it and came out. We left the plane there again for them to figure out what was wrong, a couple of days after Mark called stating he was sending the mags out. We went home to California. We received a call a week later the plane was ready "all is good" the airplane is fixed" they ran it up several times according to this person that called, and it checked out good.

April 21, 2014 We returned to Lake Havasu City Departed 1:45pm MST

When I got there Mark explained what work had been done, It was "ready to go" I suggested Mark come with me to start the engines, he did, I then got fuel and proceeded to the run up area, did a complete run up of both engines. I took off. ~~all seems ok until about 12-15 mile out of HII the throttles became difficult to keep in sync, upon approaching A20 I tuned in AWOS flew over the airport to check the windsock~~ AD

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

~~Continued from page 10~~

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Continued from page 10

All seemed ok until about 12 to 15 miles out of Lake Havasu the throttles became difficult to keep in sync. Upon approaching Sun Valley Airport I tuned in AWOS for Bullhead City/Laughlin and flew over Sun valley to see the windsock and tetrahedron for wind direction prior to landing. I turned downwind for runway 36, when I final from base suddenly the turbulence became extreme. I had to add power to stay over the runway, I tried to slow it down to land and knew I would either come to close to the end and go off into the fence. At that point I made the decision to go around. I pushed the throttles full forward and at that time it seemed like the airplane would not fly, Like it was being pushed down, that is when I started looking for a place to put it down. I am not sure if the engines completely failed or what. I just know I did not have any power. crashed at approximately 2:00 pm MST

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
