

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: San Bernardino State: CA
 ZIP: 92408 Country: United States
 Latitude: W117.14.09' Longitude: N34.05.72'
(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 03/03/2015 Local Time: 12:00
mm/dd/yyyy Time Zone: PST

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N4003S

Manufacturer: Robinson Helicopter Company

Model: R-22 Beta

Serial Number: 1409

Year of Manufacture: 1990

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

- ☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 1370 lbs

Weight at Time of Accident/Incident: 1200 lbs

Number of Seats: 2 Flight Crew Seats: 1

Cabin Crew Seats: N/A Passenger Seats: 1

Number of Engines: 1

Category of Aircraft

- ☐ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☒ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

☐ Explosion at Unknown Time
☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft rolled over. Substantaial damage to: Drive System,Airframe,Fuselage,Cabin.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Pilot departed KRAL on a practice and proficiency time building solo flight. VFR, calm wind conditions existed. Intended route: KRAL - F70 - KSBD - KRAL.

Upon initiating an eastbound normal approach to a hover to KSBD (parallel to rw 6) (specifically, to the intended landing on taxiway (F) which is a common helicopter approach and hover area), the pilot stated to the helicopter owner, he was "too fast and too high on short final". The pilot also stated he "should have initiated a go-around".

After completing a normal approach, he terminated at a point approximately 150 feet past the intended landing area. This is an unimproved area east of taxiway F, with a surface comprised of rough dirt, grass, weeds, etc.

The pilot began to maneuver at a low hover to return to the taxiway F area. While maneuvering and conducting a 'pedal turn at a hover', the right rear skid contacted the dirt/grass surface. The aft right skid extension became lodged in the dirt/grass and seperated from the landing gear. The aft skid/landing gear, created a pivot point, and the aircraft rapidly spun, pivoted and rolled over on its right side. During the roll-over, (1) main rotor blade contacted the ground at what appeared to be a relatively high rpm. The blade skin seperated and was imbedded with dirt and grass. The blade seperated from the hub at the blade attach bolt, and was located approximately 150' east of the wreckage. The second blade contacted the surface and the cabin, however remained attached to the hub.

According to the pilot, the engine was operating as the aircraft came to rest. The pilot shut off the fuel valve. The pilot then removed his seat belt and exited the aircraft.

The pilot waited near the wreckage, however no assistance responded. The pilot then walked across rwy 6/24, then continued to walk on the taxiway airport area toward the operating control tower. At approximately 1 - 1.5 miles west of the wreckage near the base of the control tower, the pilot was contacted by airport ground personnel.

The pilot was transported to LLUMC as a precaution. He was treated for a small cut on his forehead and released.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Pilot should have initiated a go-around.

Pilot should have not hovered below recommended 5' hover height per RHC Safety notice #9.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

All Flight Controls, Drive System components, Powerplant, Fuel System, etc examined and continuity confirmed.
Normal operation prior to accident. All damage occurred post impact.
