Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damaged left & right wings, Propeller, left & right gear, engine mount.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I had been using aircraft for aerial application using a private turf strip. I was new to this aircraft with 15 hrs. I had been using aircraft for 5 hrs that day, completing five takeoffs and landings on that strip and feeling very comfortable with aircraft hauling light loads (half of useful load). I had made many landings on this strip in the last few years. This was my last load to complete the job. While taking off half way down runway (about normal lift off) aircraft started porposing do to bump, started to lose directional control. I had to get on the brake to regain directional control. I got aircraft straightened out but not in line with runway thinking it was going to fly. While going of runway aircraft collided into a 3 strand wire fence and then bounced across a dike doing damage to gear and skidding to a stop.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Kept better directional control of aircraft.
