Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.					
Seth and I showed up at KIDA at 6:00 AM local time to preflight aircraft. Enigne was turned on approx. 6: 35 AM, Taxi and run up were done at hold short line of runway 2. No traffic in area, made a self announced radio call. Take off roll was uneventfull but inital upwind climb Seth yeld we have smoke in the cockpit. I then made and early Right cross wind turn, made a radio call asking tower if they can hear me then saying mayday 7269T we have smoke in cockpit and are coming back for a landing. By the time we were what i thought was down wind we had zero visibility in the cockpit. Seth hooked up oxygen cannula and gave it to me. He put his face in his shirt. At some point I put the flaps all the way down and pulled the power. I have no memory of turing base or final. The next thing I remember was sticking my head out of the window and lookng to and seeing the runway, we were allready over the begging part of runway 2. I pushed the yoke down and keep deceding. I personaly dont reacall the touch down. Seth said we touched nose wheel first then settled back down flat. I also dont recall if we landed with breaks already pressed down or if I locked them up after we touched down. I then yeld to seth to get out as I pulled the mixture control to off. We exited out the only front door on the pilot side.
