NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Took off from KIFP at 1625 MST for an intended flight to KDVT with 3 hours of fuel and 3 passengers on board. When I attempted to retract the gear, the nose wheel would not retract at all and main gear retracted 3/4 of the way up. After I lifted the gear handle, there was a loud banging noise and no gear indication light came on and the gear handle stayed in the up position. I tried to cycle the gear back down and nothing happened. I then tried to lower the flaps and they would not move, telling me I probably had a hydraulic issue. I then notified tower about the issue and they cleared me for a low pass so they could visually see the gear position for me. I then went up to 3,000' MSL and orbited just east of the airport to troubleshoot and attempt to fix the problem. I tried the emergency gear extension first, then tried rocking back and forth, and then tried porpoising. I did another low pass by the tower and the controller informed me that the gear was still in the same position as before. I then declared an emergency and came around to runway 34 at KIFP and performed an emergency landing with only the nose gear extended and no flaps. The nose wheel touched down and I then let the plane down on it's belly. We slid for approximately 2,500' and then came to a stop on the runway. The plane then tipped on it's left side on the wing. All passengers got out unharmed and the fire truck sprayed the plane with foam.
