Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Starboard wing hit tree at tip and broke wing back 5 ft from tip damaging starboard aileron. Port landing gear collapsed upon hitting the ground. Nose gear broke off and drove supporting structure into engine damaging the prop pitch control mechanism. Prop was bent

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Run-up required 4-5 minute wait for departure. 12:45 PM took off from 28L Hayward in route to Palo Alto (PAO). Climbed normally to about 200-300 ft. Was throttling back a little when engine quit producing power. Prop was still turning but the performance felt like idle. Pushed the throttle and mixture forward and checked the fuel booster pump but didn't have time to try the left only or right only tank setting. Believe that I was on fuel setting of "Both." Started a return to the airport but after about a 30 degree turn realized that would not work. Turned back to the golf course fairway. There were people up the fairway and down the fairway so decide to go straight across. Tried to go between two small trees. Starboard wing clipped one tree and port landing gear and nose gear collapsed upon hitting the fairway. Slid about 150 feet across ending up on a cart path transverse to the direction of landing. Turned off the electrical power. Turned off the fuel valve. Turned off the ELT which had triggered. Disconnected the battery. d
