Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Took Bullpup 352Y, which is not yet licensed, out to runway 33 for taxi tests. I made several slow speed runs then decided to do a high speed run. A wind gust picked the plane off the ground. I decided there was not enough room to abort and the best option was to go around and land. On down wind the plane lost power and the right wing impacted a tree. The plane spun around and ended up with the front of the plane on the ground and the tail leaning against a tree. It was at about a 85 degree angle standing on its prop. Since the engine ran good up to this point I suspect it was carburetor ice. This plane has no carburetor heat control.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Lost power on downwind, reason unknown. Suspect carburetor ice. No carburetor heat on plane
