Description: Post-accident interview

I spoke with witness Debbie Herzog about the accident at Johnson Creek airstrip on 06-18-2015.

Ms. Herzog was sitting outside of her camper on the west side of the runway about $\frac{3}{4}$ of the way toward the south end. She watched the approach. N6939K touched down just before mid-field bounced 2 times and added power to go around. The nose pitched up high. The left wing dipped and struck a large pine tree about 30 ft up from the ground, spun around flipped upside down and impacted the nose of a Chevy Suburban. Three or four other aircraft either took off or landed after the accident.
