- Thank you to Pacific Blue Air for allowing me to get to as close as humanly possible to my childhood "Super Power" of flight
The Pacific Blue Air team exudes customer service and the adventure speaks for itself. This experience is a "must do" for Los Angeles locals and visitors. Do it! Do it!

Pacific Blue Air / Yelp Site Extracts 3/23/16

Do it!

My boyfriend and I did a 45 minute flight and oh my goodness... Absolutely exhilarating. Our pilots, Henry and Vaughan, were super cool and most importantly, were top notch, quality, & highly experienced pilots. They made us completely comfortable from pre-instruction to flight to landing. They even allowed us to choose our desired flight route. I have been a resident in Los Angeles for over 11 years and to be able to fly over my "home" and see it from above, was so exhilarating and provided me with a deeper gratitude of my home. We were even allowed to take over the pilot seat when we felt comfortable ..."I was flying" My cheesy smile was with me the entire experience & it is one memory I have been grateful for since (I am smiling now just thinking of it).

Definitely grab some pictures and video if you can - we received ours a few weeks ago and it was completely worth the additional fee.

Lastly, want to commend the actual operations of the company. This adventure was a '14 holiday present from my boyfriend. Courtney was my first and main point of contact. She was always extremely kind & understanding with accommodating our flight preferences (sunset, go at the same time, etc.) and unexpected schedule changes (had to reschedule a few times). I was so excited to meet her in person because her warmth during the scheduling process was so unbelievable. She is honestly just as unbelievable in person. When the flight ended and I was talking to her, I saw her business card. I was taken a back - she was an owner of the company. Wow. Even more grateful and supportive. Good people helping others create memorable adventures & experiences! The leadership, experience and expertise with Pacific Blue Air will not disappoint. Again, Do it! Do it! Do it! You are in for an unforgettable experience!

- OMG!!!

Thank you so much Henry and Courtney for giving me the most exciting flight ever. This is a Bucket List must do. If you are adventurous try this when in L.A. Henry even let me fly REVO!! They are two of the most amazing people you will ever meet. I had an awesome day!

- Thank you so much Henry & Courtney! This was the most exhilarating experience I've ever had. I can't believe I waited so long to find out what this was. I spend most of my summer surfing in the southbay and had seen the glider fly over my head multiple times. I had no idea that i could fly in it! Sky triking was the hands down the most fun thing to do in L.A. Henry & Courtney make you feel like part of the team and make the entire event a super fun experience. If you haven't done this yet, DO IT! Especially before any of your friends do it. They will make you a video you can show everyone what it was like!

- This is a BUCKET LIST item for sure!! This was the best birthday present ever and even though I was scared at first, Henry (the pilot) made me feel relaxed and safe. It is a truly amazing thing to experience. You get to see the world from a whole new perspective. I cannot recommend it enough - for yourself or as a gift to someone else. You will NOT be sorry!! :)

- To be given the sheer and natural ability to fly, as birds truly do, is as close as you can come to describing the pure exhilaration of having the opportunity to fly with Pacific Blue Air in one of their radical trikes! What an incredible experience...both on the ground and in the air. They are truly a first class operation from initial point of contact to your departure from the air field. This is definitely a bucket list item...one that you're going to want to go back and do over and over again! A+++++

- This review is long overdue BUT this EPIC adventure left me speechless for days...well into a couple of months. I am still on "Cloud 9". This was the birthday gift of a lifetime. Milestone 60 is the start of many more epic adventures like this. Never too old or too young to enjoy this experience. Glad I purchased their AMAZING video/photo package. I can relive that experience over and over again until the next flight.

The level of service was quite IMPRESSIVE in the sky as well as on the ground. Sir

Pacific Blue Air / Yelp Site Extracts 3/23/16

Henry's knowledge and experience of the light sport aircraft as well as his humor put me at ease throughout the flight tour. Being able to navigate the aircraft was AWESOME.

On ground level, Ms. Courtney and Ms. Erin were most hospitable and prompt from setting the appointment, a warm welcome to the hangar and taking care of the necessary paperwork.

Overall, it was a MEMORABLE experience of a lifetime. Thanks Pacific Blue Air. Much success to Sir Henry, Ms. Courtney and Ms. Erin.

I'll be back for more fun flying. Groupon or no Groupon, let's go fly a TRIKE...!!!

- Booked via Yelp
- Flying a trike is an absolute "must do," and should be on everyone's bucket list! What more, is to fly a trike with Pacific Blue Air! I couldn't have asked for a better all around experience! Their hangar was absolutely cool! The moment you step in there, you'll get this feeling of adventure but in a "no sweat" type of way. The Pacific Blue Air team were nothing but "cool" and made you feel like you were there to hang out and have fun! Even going to the restrooms were fun. You had an option of taking a scooter to the restroom! The flying experience was great! The instructor was hilarious but also experienced and made you feel comfortable. I'll definitely be back to try this again!

- My father had an amazing experience flying up in the sky with Pacific Blue Air. "The cool air, the view, the excitement, was all amazing", my father said. Henry and Courtney are really helpful and nice. Beforehand, booking our appointment was a breeze. When ready to go on flight with a cool blue astronaut looking suit that you put on, Henry (the pilot) will go through all the safety features with the aircraft, so we can assure that it is a safe flight, at all times.

Overall my father had a great time. He told me his experience and I shared it with you, and next time I will be sharing my experience.

- What a fun experience! I purchased a flight for my boyfriend as a 50th birthday present. In return he purchased a flight for me as it was our 1 year anniversary. Working with Courtney to set up the event was a breeze. She was a joy to work with and so easy to talk to.

The views were beautiful and I felt very secure with my pilot, Henry. Off we went to the coast with a birds eye view passing over Torrance to Redondo Beach and all the way around passed Terranea and Trump. Henry keeps you involved every step of the way and you have the option to fly the plane yourself, which is totally cool. Seeing this area from a different point of view was a unique experience and fun to say the least!

I felt secure and well cared for and definitely recommend Pacific Blue Air. It's a great way to see things from above.

- Breath taking experience!!!
My husband got me this adventure as a birthday surprise, at first the thought was scary, but I can't say it better once we where in the air it was an amazing! A experience that I definitely will not forget. The girl who did all the booking and helped me get ready was so sweet and nice. It definitely helps when the place has very good customer service skills and they love their job. I bought the video and pictures and I would say that it's worth it so you can share your experience with other people, but it's still nothing to the real thing. Honestly if you have fears of the safety, please don't, once you see the structure of the glider it's really safe. I would definitely recommend this to anyone seeking an adventure! Have fun and enjoy the moment!

- From the moment I met Courtney at the gate the experience was great! Henry the pilot made me feel so comfortable and eased me onto the craft, and I must say, it was one of the best experiences i have ever had! This is definitely a must do if you are a thrill seeker. I can't wait to do it again.

Pacific Blue Air / Yelp Site Extracts 3/23/16

I have lived in the Southbay for over 15 years and never knew places existed in PV that Henry took me by. Wow, what an awesome time I had!!!!

- Wow!!! So Cool. If you are a thrill seeker you must do this. It's an awesome flying trike. I LOVED IT!!!

You zoom up into the sky, out to beach and travel along the beautiful coastline. I recommend going up close to sunset when the cliffs are highlighted by the sun and the water is all sparkly. It was stunning.

Henry and Courtney exude joy and they manage to be totally professional, while maintaining a relaxed, easy going vibe that can calm the most skittish of passengers, (aka my girlfriend, who loved it.)

And definitely get the video, because you will want to relive the memory of flight whenever you can and show to friends for bragging rights.

Thanks Courtney and Henry. You rock!

- From the initial phone call all the way through receiving video footage of the flight afterward, this experience was phenomenal. Courtney and Henry were so hospitable as I waited in the hangar while flight instructor Vaughn took my husband for his 60-minute flight. It was a clear, gorgeous day and they were able to fly so close to the beaches and cave explorers that people were waving at them. My husband's comment was that this type of flying is the closest a human can ever come to being a bird. He felt perfectly safe as the aircraft has an excellent glide ratio and is also equipped with a parachute. Henry patiently answered all my questions about ownership of a motorized hang glider as we are thinking about purchasing one someday and becoming certified to fly it.

- Try it you'll love it!!!! Fantastic experience from the booking all the way through the flight and video review. I will definitely be using them in the future as a gift or just to do another fun flight over Los Angeles. They make everything really easy and comfortable. I read the negative review from a resident complaining about the noise and I have to say it is not accurate. I also live in their normal flight path and would rather have this aircraft buzzing me than the banner flying planes or helicopters that dominate the airspace over the beach every weekend. The plane is quiet and small and only flies over a few times a day at the absolute most. I'm glad they're in the area. Go give it a try!

- Thank you Henry and Erin for an amazing experience. First time flying in something like this, we had a great time!!

For people who might have apprehensions of flying this is a different experience than being in a plane. It's so much better. You're not locked into a box with windows, you're experiencing the moment, gliding through the wind in the safest small craft they make.

Can't wait to go again!
