Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> Right main gear failed inboard underneath a/c. Right wing bent upward from mid-aileron outboard. No other damage. No prop strike.					
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>					
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.					
I departed Gallup New Mexico (KGUP) at about 1245 MST GPS direct to Prescott AZ (KPRC). About 15 nm east of KPRC I obtained ATIS information Victor. Prescott tower cleared me for straight in approach runway 21L. A little over one mile out I received clearance to land. My approach was slightly high, and I executed a left slip to lose altitude. With proper approach slope established (as indicated by PAPI lights) I returning to a left crab to compensate for a slight left crosswind, which I'm estimating was about 7kt, which is well within the Luscombe's x-wind capability. At runway threshold about 100 feet up I established a left-slip crosswind correction, and I touched down in a slight left slip, aligned with and on centerline, at about the 1500 foot markers. Touchdown was three-point, full stall. The airplane rolled out straight until it decelerated to estimated 15 mph. At that point it began a left yaw diversion, and I could not stop the yaw with full rudder on the floor. The aircraft turned approximately 135 degrees left. The right main gear folded underneath, and the right wing slid into the pavement, in a classic groundloop. Deceleration was slow enough that the ELT did not activate. Tower advised they were sending help. The passenger and I exited the aircraft. I reached back in and turned off ignition and fuel. There were no injuries. Prescott Fire Department responded almost immediately. Fire department and airport personnel assisted in removing the damaged a/c from the runway, which was then FOD checked and re-opened.
