NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On a VFR day flight from SBA to BFL, Meadows Field tower cleared N346MC to enter left base and land on Rwy 30R. N346MC entered the left base of the BFL traffic pattern and deployed the gear and got a gear unlocked light and a right main gear unlocked indication (no light) on the right main gear. I reported the problem to the tower and did a flyover of Rwy 30R and asked the tower to visually confirm whether the right main gear was down. The tower confirmed the gear appeared to be down. I retracted the gear and departed the traffic pattern to the west. Reviewed the emergency procedures checklist and performed the emergency procedures and manually "cranked" the gear down. Got the same indications of the right main gear unlocked (no light) and gear unlocked light. Meadows tower advised they were "rolling" the fire and emergency crews. Reentered the downwind traffic pattern and was cleared to land by the tower. Touched down on the left main gear and tried to gently put weight on the right main gear. The right main gear held for a portion of the roll out and then collapsed. The aircraft skidded and I steered it off 30R onto taxiway [H]. I shut the engines down and turned off the master switches and exited the aircraft. The fire crews sprayed the aircraft with foam.
