Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Bent Landing gear, rudder, elevator. Broken canopy. Holes in bottom of wing. Propeller blades broken.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On July 4th 2016 I departed Homeport Airport (11WA) in Spokane County, WA on a pleasure flight to Saint Maries, ID (S72) in Vans RV6 (N916BN). Prior to the flight, I checked NOTAMS and the weather in the area. There were no significant weather issues and no NOTAMS relevant to my desired flight path. While the aircraft was in the hangar, I performed check-list guided visual pre-flight inspection of the airframe. I noted no discrepancies. I checked the engine compartment and confirmed oil and fuel levels necessary for the flight.

After starting the engine, I observed the engine gauges to be all displaying in the proper ranges for safe flight. I performed an engine run-up and checked the electrical system. No abnormalities were discovered.

Takeoff occurred at 9:10 AM local time. Takeoff was normal in all respects and the engine power did not seem to waiver. I encountered no mechanical issues while en route.

As I got closer to S72, I visually confirmed that the weather was still VMC. I entered the pattern for runway 28 and began to power down the engine. While on the base to final turn, the engine completely quit. I verified that the carb heat and the fuel boost pump were on and I changed the fuel selector to the other tank. I recall looking for a safe place to go and wondered if I could make it to the airport. Most of the fields in the area were full of hay bails so I continued my turn towards the airport. We touched down about 500' short runway 28 on the landing gear and the aircraft flipped over. The aircraft suffered damage to the wings, the landing gear, the canopy, the rudder and the elevator. No one on board was injured. No fire occurred.
