Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Airplane totaled, landing gear collapsed , prop curled back , right wing bent 5 ft from end

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We started work at 20:00 preparing for the nights work. After preflighting the aircraft and starting up. the tanker loaded the airplane with diluted chemical. I taxied to the west end of Brawley airport and took off heading east. The airplane took off normal and at a normal distance and began to climb. At 1/4 mile past the east end of the runway I pulled the power back not to red line the rpm. (it was not in the red I just didn't want it to go in the red). At that point the plane leveled off and I pushed the nose over a little trying to gain airspeed, I touched the flaps a little to get a little lift and pushed the throttle back forward and the plane started down. I knew the expressway and a wire where directly in front of me so I turned south to parallel the road. I was almost straight and level heading south when I hit the ground collapsing the gear and sliding on its belly and spinning to the right ending up facing north northeast. I pulled the power, prop, and fuel cutoff back, radioed to the crews working that I put the plane down, turned off the master and exited the aircraft. I called my boss by phone and he began the steps of post accident.
