Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Front wheel, engine, propeller, fuselage, windshield, and right wing damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The accident occurred because I failed to remove the control wheel lock from the yoke of the airplane. This lock is something I rarely use, in that the airplane is always hangared. Although the winds were light, I decided to attach the control wheel lock to the yoke.

Unfortunately, my i-pad which was attached to the yoke as well, partially obscured my view of the lock when I returned to the aircraft. I normally remove the i-pad when I land, but in this case I did not do so.

I did a normal walk-around even though the aircraft never left my sight during lunch. The taxi to the run-up area was normal, but I noticed that the fuel tanks were reading differently. At the run up area I changed my normal checklist pattern and I turned the engine off in order to manually check my gas tanks with a tube type indicator. I wanted to be sure of the levels. After returning I completed my "before take-off" checklist without checking the operation of the flight controls or stabilizer.

Upon take-off I immediately recognized something was wrong and told my passengers that I needed to abort the take-off. I cut the fuel and applied the breaks but was unable to stop the aircraft before reaching the end of the runway.
