I departed the fishing vessel towards to east and made a normal climb to about 1000 feet MSL. We began scanning for fish for the next 30 minutes. During a normal instrument scan I noticed that the Generator Light was illuminated. I applied collective friction to keep the collective in a fixed position so I could hold the cyclic with my left hand and as I was attempting to reset the generator switch with my right hand, I felt the helicopter drop suddenly. I abruptly put my right hand on the cyclic and left hand on the collective and lowered it and added right pedal. I delared a mayday call on my FM radio and continued the autorotation. I noticed that the Main Rotor RPM was at the bottom of the green. The next thing I saw was ocean coming up quickly and at about 30 feel I flaired the aircraft and applied full collective pitch. After impact, the aircraft was upright and floating.
