Aviation Accident Investigator
Western Pacific Region

Date: May 4, 2017
Person Contacted: Percey Inciong (Witness)
NTSB Accident Number: WPR17LA092

Narrative:

Mr. Inciong reported that he exited the building for an outside break when he heard a “loud weird noise”. When he looked, he observed an airplane that appeared to be landing; he did not recall it having any lights on. The airplane impacted a stop sign and drug it until the airplane came to a rest. When the airplane stopped he went over to the airplane to make sure the pilot was ok. Mr. Inciong reported that the pilot was very emotionally distraught then suddenly he would appear to be perfectly fine asking where the nearest 5-star hotel is. The pilot switched between distraught and normal several times during their conversation. Once authorities arrived, he disengaged from the situation.
