Subject: El Monte Plane Crash

3 Occupants were inside the plane, Student Pilot, CFI, and a 12 year old in the back seat. Per Carl PD 45, the student Pilot was on the controls and they had done about 8 or so Touch and Go's at the airport with no problem. The last Touch and Go, they were going somewhere around 55 Knots, just prior to Touchdown on runway 19, the plane Cessna 172 Tail#N6832D, veered to the right uncontrollably. The student pilot introduced power and it made the problem worse. The CFI took the controls and introduced full left pedal which had no effect. The Cessna ballooned up then back down west into the wash about midfield. The first point of impact was on the west sloped wall of the wash. It then traveled approximately 50-75 ft where It crashed into the trees on the west side of the wash. According to Carl, he spoke with the pilots and it didn't appear either of the two were intoxicated and did not appear there was any crime. All injuries appeared to be Minor complaints of pain, and all occupants were transported to County USC medical center. Carl believed it to be Pilot error, but was unsure if there was possibly a mechanical issue with the plane. All occupants were treated by L.A. County Fire Squad 167. Battalion Chief Banuelos of Battalion 10 was in charge. Occupants' names and horsepower are as follows. Photos will be attached.
