

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Mc Clellan-Palomar Airport KCRQ State: CA
ZIP: 92011 Country: U.S.A.

Latitude: 33.13 N Longitude: 117.28 W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 06/22/2017 Local Time: Around 1pm
mm/dd/yyyy

Time Zone: PST

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N380AL

Manufacturer: Cessna

Model: 421B

Serial Number: 421B0329

Year of Manufacture: 1972

Amateur-Built: ☐ Yes If Yes: ☐ Kit/Plans Make: _____
☐ No ☐ Original Design

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: See W & B lbs

Weight at Time of Accident/Incident: See W & B lbs

Number of Seats: 8 Flight Crew Seats: _____

Cabin Crew Seats: 2 Passenger Seats: 6

Number of Engines: 2

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right landing gear is broken. Right engine prop blades struck the ground and are bent. Right wing struck the ground and the damage is unknown. Visibly the flaps are damaged and the metal around the rear of the engine cowling is bent. The right part of horizontal stabilizer also struck the ground and the damage is unknown. The plane came to rest with the right wing and right back part of the horizontal stabilizer touching the ground.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On June 22nd 2017 I met pilot Michael Upton at French Valley Airport (F70) for training in N380AL. Micheal Upton was to provide me with the necessary flight training for insurance in the Cessna 421B. This was our first flight in N380AL. The plane was just coming out of maintenance and we spent a little over an hour going through the plane preflighting, checking all required documents. We also spent time talking to the mechanic on the maintenance performed which included discussion of the landing gear. In his opinion the plane was in good flying condition.

After fully checking the plane we ran up both engines in front of the maintenance hanger and then again at the run up area at the beginning of runway 18. We departed runway 18 French Valley Airport (F70) and climb to to circle over the airport between 3000 and 4000 msl to check the engines. The takeoff was normal, gear retraction was normal, and engines we operating normal. After 15 minutes of circling over F70 we flew direct to Ramona (KRNM).

We performed a right base entry entry to runway 27 KRNM. The gear extended normal and we checked for three green lights, for gear down and locked, at time of extension, on base, and on final. The full stop landing on runway 27 was smooth and normal. We exited the runway and taxied back for takeoff on runway 27. After takeoff we retracted the gear and all indication was the plane was operating normally. We contacted approach for the a practice ILS to runway 24 Mc Clellan-Palmar (KCRQ).

We performed a right base entry to intercept the ILS 24 into KCRQ. We extended the gear and received three green indicating that all the gear was down and locked. We intercepted the ILS approach coarse and performed the approach in visual conditions. It was clear with very light wind. The gear down indication lights were checked two more times at the beginning of the approach and again on short final. Both times all three lights we indicating green, that all the gear was down and locked. Touch down on runway 24 was normal, on centerline, with no drift. The rollout after landing was also normal and uneventful. The plane slowed down normally to just above taxi speed (I would estimate 10 to 15 mph) and we were planning to exit on taxiway N3. The plane then started to wobble. I kept the plane moving straight not using the brakes. The wobbling got worse and suddenly the right side for the gear broke and the right wing and engine hit the ground. The plane came to a quick stop at the entrance of taxiway N3. We performed the shut down check list making sure all fuel and switched were off and exited the airplane.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
