Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller
Left wing skin wrinkle
Left flap bent outboard
Left main gear retract mechanism damaged
Right main gear retract mechanism damaged

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Aircraft Notes: 1. Very narrow main landing gear
2. Free swivel tailwheel that does not impede aircraft swinging (no lock or steering mechanism)
3. Shoe/drum style brake powered by air pressure

Aircraft landed normally on runway 12 at KAVQ. As the aircraft slowed on rollout it started to drift slowly to the left. Rudder input was ineffective due to slow speed so right brake was applied. The brake grabbed enough to start the aircraft nose swinging right. At this point left rudder and left brake were applied to counter the swing. Rudder was again ineffective and the left brake provided no stopping action. Without left brake there was nothing to stop the right swing due to the free swiveling tailwheel. The aircraft departed the right runway edge and hit soft dirt which collapsed the left gear and pitched the aircraft on its nose. This happened at slow speed and resulted in damage to the propeller, landing gear, left wing, and left flap.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

None

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Upon activation of left brake the pressure felt normal but no braking action was received. Brake acted like it was hot even though this was its first activation during the landing.
