On August 1, 2017 I was working on Mayflower strip. I received a 180 gallons load of chemical and filled the left wing. I departed to the west climbed out normal. I did my power settings. I made a Right turn to the east to the field Narcissus 2 & Narcissus 2A. When getting to the field I flew over it to check it. I started setting up for my pass on the north side flying east and west. I noticed a power loss, leveled the wings and flew to the northwest. Some power was received then started to lose power again and force landed in Nutmeg 4 field.

Thanks,
