Good Morning Andrew,

Please find attached the overhaul log entries for both the engines we supplied to Videre Aviation. After speaking with the owners of the aircraft, I will not be attending the inspection at the end of this week. His initial reports seem to indicate a fuel related problem resulting in double engine failure. He said that engine CHT's steadily increased until the left engine quit followed shortly after by the right engine. If you have any questions, please call me.

Sincerely,

John Jackson
President/DAR
